PINpoint Version 2.5 now released with new feature to enhance its value: that allows BlackBerry® users from any corporation or government agency the ability to now also “push” documents to devices, in addition to emergency contact lists!

Toronto, ON, September 29th, 2009 —Tenet Computer Group Inc., a leading provider of wireless mobility applications, today announced it has released PINpoint v 2.5 with the ability to store vital documents on users handhelds for immediate access regardless of coverage.

PINpoint keeps people connected during the most critical of times: power outages, server failures and emergency situations. PINpoint for BlackBerry® ensures accurate PIN-to-PIN messaging in crisis situations, quickly turning any BlackBerry® infrastructure into an emergency communications network that is easy-to-deploy and very affordable. Now with the latest release of PINpoint v 2.5, users have the capability to ensure they have access to the latest emergency manuals, notifications, floor plans / maps and contact lists via BlackBerry®, in emergency or crisis situations.

PINpoint allows various corporations and Government agencies to have an effective back-up communication network in place aimed to extend and maximize their current BlackBerry® investment.

Using the PINpoint Management Console, the system administrator specifies the URL's of the documents to be pushed, and the sequence in which they will be presented on the handheld. Documents are grouped into Collections, which are then mapped to Groups of recipients. Groups are created dynamically by PINpoint, based on each person's attributes, as defined in the organization's BlackBerry® Enterprise Server or Corporate Directory (e.g. Microsoft Active Directory or Novell eDirectory).

This design provides simplicity and flexibility, while greatly reducing or even eliminating the need for any additional maintenance, and ensures that users receive only the information that is relevant to them based on, for example, the city or department they work at, their job title, or they membership in specific groups.

About Tenet Computer Group (Tenet is a BlackBerry® ISV Alliance Partner)

Founded in 1984, Tenet Computer Group Inc. brings you the highest level of expertise for advanced Information Technology and Wireless Mobile Applications. Our offices are located in Toronto Canada, and have alliances with leading technology partners, carriers, and resellers globally.
