

FOR IMMEDIATE RELEASE

**Tenet Computer Group's PINpoint for BlackBerry®
Listed in AT&T® Certified Solutions Catalogue after receiving
AT&T Smartphone Certification**

Toronto, Ontario, Canada, December 9, 2009 – Tenet Computer Group Inc. announced today that its award winning PINpoint Business Continuity application for BlackBerry® is now listed in the [AT&T Certified Solutions Catalogue](#).

PINpoint for BlackBerry® is a corporate Business Continuity application that facilitates cooperation and coordination, by ensuring that BlackBerry users always have up-to-date information stored on their handhelds, including critical documents and contact lists. PINpoint helps people stay connected during the most critical of times: power outages, server failures and emergency situations. PINpoint for BlackBerry® also enables accurate PIN-to-PIN messaging in crisis situations, turning your BlackBerry® deployment into an emergency communications network that is affordable and easy to use.

The AT&T® Certified Solution Catalogue allows independent software developers (ISV's) to market innovative solutions as AT&T® compatible applications that AT&T® customers and partners can access through the Internet to use their smartphones, whenever and wherever they go, to do more than just e-mail.

“Tenet is pleased to build upon its new partnership with AT&T® as a member of the AT&T® Certified Solutions Catalogue, and we look forward to reaching out with our business applications to various AT&T® customers and alliance partners”, says Rick Jordan, *Director, Sales & Strategic Alliances (Mobility Division)* at Tenet Computer Group Inc.

PINpoint for BlackBerry® allows corporate and government clients to have an effective back-up communication network in place, using their existing BlackBerry® deployments to maximize the return on their mobile computing investment. Tenet offers no obligation trial licenses and has many published client case studies available.
